A NEW LAWN SEED FORMULA

We are introducing a brand new idea in lawn seed which may very well be the beginning of a new era in lawn making.

By combining Zoysia which is the only grass known to thrive on heat in the cooler regions, with cool-season grasses, you will be able to maintain a permanent, all-year lawn. This also overcomes Zoysia's slow growth during the first year.

During the hot summer months when ordinary grasses are dormant and make lawns unsightly, Zoysia's vigorous growth will give you a vivid, luxurious covering which will crowd out that pesky Crabgrass.

In the spring and again in the fall the other grasses will predominate.
